Overview

06R focuses on fast awareness. It combines a slim outdoor-friendly exterior body with remote control convenience, m

Upgraded Window & Door Alarm

Key Features

- Remote arming, disarm, and alert control
- Direct local alarm for opened doors or gates
- Works well for pool-side or exterior access points
- Straightforward adhesive or screw-based placement

Suggested Uses

- Front and back doors
- Yard gates and side entries
- Short-term pool season setups
- Storage rooms and detached access points

Setup Notes & Reference Specs

Use the HENDUN admin center to upload the latest official manual, certificates, and revised product assets.

Reference Specs

Trigger Type: Magnetic open sensor

Control: Remote keypad included

Install Style: Adhesive or screw-mounted

Best For: Doors, exterior gates, and loud local alert use

Common Questions

Q: Is 06R only for indoor doors?

A: No. It is often used on exterior access points as long as the mounting position is appropriate for the product body and the sensor is properly aligned.

Q: Can I use 06R for pool gate awareness?

A: Yes. That is one of the common use cases when families want a direct local alarm instead of an app-based system.

Q: What makes 06R different from a standard chime sensor?

A: 06R is built more around immediate local alarm behavior with remote convenience for quick arm and disarm control.
