

HENDUN WMC Quick Guide

Outdoor-ready gate awareness with loud local alerts and remote control

Overview

WMC is tuned for outdoor use cases. It supports visible gate status, direct loud local warning style, and convenient remote control.

Key Features

- Designed for pool gates and perimeter entries
- Remote support for quicker daily use
- Built around direct loud local alerts
- Suitable for family pool and yard awareness routines

Suggested Uses

- Pool gate alerting
- Detached yard access points
- Fence doors and side gates
- Outdoor child-safety routines

Setup Notes & Reference Specs

Use the HENDUN admin center to upload the latest official manual, certificates, and revised product assets.

Reference Specs

Trigger Type: Magnetic gate sensor

Environment: Outdoor-focused installation

Control: Remote keypad support

Best For: Pool gates, fences, and loud perimeter alerts

Common Questions

Q: Is WMC made for gate applications instead of interior doors?

A: Yes. WMC is best positioned for exterior access points where families want an immediate audible warning at the gate.

Q: Can WMC support pool safety routines?

A: Yes. Pool entry awareness is one of the strongest use cases for this SKU, especially when paired with consistent fencing.

Q: Does the product depend on cellular or Wi-Fi coverage?

A: No. WMC is a local alert product and does not need internet service to function.
